

gall. quart. 40

Original half binding, 19th century, France.

History:

The manuscript is an autograph. It does not contain the author's name. Lemm ascribes it to the name of Tillard; Tillard brothers, Parisian booksellers, sometimes introducing themselves as the booksellers of His Royal Highness, King of Prussia; they might have made this manuscript for the Königlische Bibliothek. Lack of cote d'acquisition indicates that the manuscript came in possession of this library before 1828, which is the year when the accession register was introduced.

Content:

The manuscript contains a list of periodicals and intermittent prints published by scientific institutions from all over the world, organized in alphabetical order, according to the place of edition/publishing/scientific institution, e.g. *Académies /universités en general, Abbeville, Africa, Agen, Ain, Aix, Alfort, Allemagne, Altenbourg, Altorf, Amérique* etc. Information about the periodicals is organized according to the following pattern: title, editor, the place of publishing, the date of publication, the number and format of the published issues, the frequency of publishing, whether it was continued or not. Every written page is followed by an empty page, probably designed for continuation of the list. The volume begins with the list of publications concerning the activities carried out by the academy, e.g. *Couronnes académiques, Mélanges académiques, Conversations académiques* (3v^o). The volume is closed by two lists of the main literary and scientific periodicals published in France; they are organized in chronological order (according to the date of publication of the first issue), the first list until the year 1800 (18 items), the second after the year 1800 (14 items). In *Paris* entry there is a division into scientific institutions: Institut Royal de France, academies, scientific societies and other academic institutions.
