

MS. GALL. FOL. 214

Binding:

Very ordinary library binding made of marbled paper.

History:

The manuscript contains 12 codicological units. These are excerpts from different manuscripts; for some time they had been functioning independently without a binding, but were then collectively bound at the Königliche Bibliothek in Berlin, in the fourth quarter of the 19th century or at the beginning of the 20th century, according to the thematic criteria. These texts are of various origins.
